

JamiuInfosec – Cybersecurity Analyst & IT Support Specialist

Email: jamiuinfosec@gmail.com

Location: Nigeria (WAT)

Available for: Remote or On-site Roles

Professional Summary

I'm a passionate and detail-oriented Cybersecurity Analyst focused on protecting digital systems, data, and networks from cyber threats. I specialize in monitoring, detecting, and responding to security incidents, and I enjoy breaking complex security topics into simple steps that anyone can understand. My goal is to help individuals and organizations stay safe online through strong security practices and continuous learning.

Core Skills

Network Security & Firewalls, SIEM (Security Information & Event Management), Incident Detection & Response, Vulnerability Assessment, Phishing & Malware Analysis, SOC Operations, Linux & Windows Security, Risk Management, Cyber Awareness Training

Tools & Technologies

Wireshark, Nmap, Metasploit, Burp Suite, Splunk, Wazuh, Kali Linux, Nessus, Cisco Packet Tracer, VirtualBox / VMware

Projects & Practical Experience

Network Vulnerability Assessment (Home Lab Project) – Scanned a virtual network using Nmap and Nessus to identify open ports and security gaps. Recommended solutions to strengthen network security.

SOC Monitoring Simulation – Set up a SIEM (Wazuh) on a test environment. Detected simulated brute-force attacks and created incident reports.

Phishing Awareness Training – Designed a short guide to help users recognize phishing emails and social engineering tactics.

Certifications & Learning

- Google Cybersecurity Professional Certificate (in progress)
- Codar Tech Africa – Cybersecurity Track (current)

- CompTIA Security+ (planned)
- TryHackMe / HackTheBox Labs

Education

Federal University of Agriculture, Abeokuta (FUNAAB) – B.Sc. Graduate
